EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science

Threads: Artificial Intelligence & Theory

Relevant Coursework: Data Structures and Algorithms, Automata & Complexity Theory, Discrete Mathematics, Linear Algebra

Atlanta, GA

May 2028

GPA: 3.94, Faculty Honors & Dean's List

TECHNICAL SKILLS

Programming: Python, Java, TypeScript, JavaScript, Node.js, React, React Native, Next.js, Expo, Fast API, SQL, Django, JAX, NumPy, Pandas, Langchain/LangGraph, PyTorch, TensorFlow, scikit-learn, Tailwind CSS, MATLAB, Assembly, REST APIs

Cloud + Tools: AWS, Azure, Google Cloud Platform, Vercel, Docker, Git, Kubernetes, PostgreSQL, DynamoDB, MongoDB, CI/CD, JIRA

EXPERIENCE

Amazon Web Services (AWS)

Software Development Engineer, Q in Connect

Seattle, WA

May – August 2026

- Designed and developed a hybrid tool retrieval service for Amazon Connect customer-service AI agents, achieving 97% retrieval accuracy across internal benchmarks using BM25, embeddings, and regex search across realistic 5–300 tool catalogs
- Reduced input token usage by up to 93% by dynamically injecting relevant tools at orchestration runtime, improving response quality and context bloat for smaller models under constrained context windows such as haiku-4.5 and gpt-oss
- Improved time-to-first-token by up to 27% while preserving tool-selection quality, reducing perceived latency and enabling voice self-service agents to scale reliably across larger enterprise tool catalogs without degrading orchestration performance

Global Futures and Options Exchange (GFO-X)

AI Engineer

Hong Kong

May – July 2025

- Built a RAG engine (vLLM, LangGraph, PyTorch) for Jira/Confluence agents that achieved >90% across RAGAS accuracy metrics, reducing ticket resolution time by 40%, saving an estimated \$500K+ annually in operational costs and support overhead
- Developed a Confluence scraper + classifier, indexing 1,000+ internal docs into PostgreSQL, which reduced knowledge retrieval from hours to seconds and boosting employee productivity by 20% across 200+ staff across 5 business units globally
- Designed a ReAct based multi-agent workflow (gap analysis, ticketing, sentiment checks) and automated pytest QA pipelines, improving sprint planning by 30% and reducing QA cycles 70%, saving approx. 80 engineer hours/month for patch deployments

FundFluent Limited

Product Development Intern

Hong Kong

June – August 2023

- Led an automated SEO content pipeline publishing 50+ blogs, boosting organic traffic 120% and \$100K+ in free marketing value
- Analyzed 50K+ user events with Pandas/SQL to identify bottlenecks, informing product changes in v2 used by 1,000+ SMEs
- Researched grants and government funding datasets to identify SME pain points, directly refining product features and strategy
- Won Most Outstanding Student from HKU Business Academy (cohort of 200+ students) for product strategy pitch

PROJECTS

Slideln

React, Next.js, Gemini, APIs, Web Scraping, Cloud Deployment, FastAPI, PostgreSQL

April 2025 – December 2025

- Founded B2C outreach tool with 1K+ users in 3 weeks, 500K+ impressions, and \$5K+ Azure credits, placing 1st at GT Shipathon
- Deployed full-stack platform with 3–5× higher email replies than standard tools, unlocking new monetization in \$15B+ industry
- Scaled engine to handle 10K+ automated emails/day with real-time analytics SaaS revenue potential of \$10–20K MRR

Heston Model Options Pricing Engine

Python, Stochastic Processes, Monte Carlo Simulation, Financial Modeling

August – December 2024

- Developed an options pricing engine with the Heston stochastic volatility model, improving calibration to market data by ~20%
- Implemented Monte Carlo simulations with Euler-Maruyama discretization and antithetic variates for efficient option pricing
- Modeled arbitrage-free volatility surfaces and optimized performance with NumPy based vectorized computation

LEADERSHIP/COMMUNITY INVOLVEMENT

Involvements: Alpha Kappa Psi (Professional Business Fraternity) – Director of Social Events, Startup Exchange – Community Growth Executive, GT Venture Capital, Trading @ GT – Project Team Lead, Inference Lab – Undergraduate Researcher

Honors/Achievements: Placed 15th globally at the International Young Physicists' Tournament (IYPT); Silver Medal in Economics Olympiad; Gold Medal in the UK Mathematics Trust Senior Challenge; Most Outstanding Student at HKU Business Academy

Interests: AI, FinTech, Startups, Venture Capital, Guitar, Cooking, International Travel, Volleyball, Fitness, Coffee, Hiking, Film
